Achieve your training goals with SharpSCHEDULER™

TRAINEES

- **TRAINEE PROFILES**

Administrators can create detailed trainee profiles which can be used throughout the system for enrollments, notifications, reporting, etc.

- **SCHEDULE CONFLICTS**

SharpSCHEDULER™ will identify any schedule conflicts the trainees and trainers might have and will suggest alternatives to resolve them.

- **INDIVIDUAL ATTENDANCE**

Upon class completion, trainers and administrators can record attendance and score information of enrolled trainees. Last minute enrollment changes and attendance can be recorded as well.

- **TRAINING PROGRESS**

Based on enrollment and attendance records system will track individual trainee progress as well as provide a snapshot of overall training.

CORE ENGINE

- **PERFORMER ROLES**

SharpSCHEDULER™ establishes a virtual link between trainees and courses based on performer roles. Based on this link the system identifies training needs, tracks course utilization, etc.

- **EASY INTEGRATION WITH HR DATA**

SharpSCHEDULER™ can be easily configured to accept HR data feeds -- either as scheduled automated process or through manual uploads.

- **MULTI-TIER REPORTS**

SharpSCHEDULER™ collects vast amounts of data, which it then summarizes and presents in the form of multi-tier reports. Advanced reporting functionality enables the user to drill down from high level summary to the most granular data level. Multiple reports can be exported to Microsoft Excel™ format.

- **MULTIPLE NOTIFICATION OPTIONS**

SharpSCHEDULER™ offers a variety of notification templates. Notifications can be scheduled to run automatically or be executed manually by the administrators.

COURSES

- **CATALOG**

Maintain your course catalog. Upload and share course related materials.

- **CLASSES**

Schedule classes based on catalog items. The system will check for schedule conflicts.

- **SCHEDULES**

Once classes are created, they will appear on a class schedule which can be filtered in multiple ways -- by course, location, classroom.

- **ENROLLMENTS**

Intelligent class enrollment automatically identifies trainees that need to be enrolled in a selected class. Administrators can filter the lists further by location, department, etc. Mass rescheduling of trainees into alternative classes is also available.

- **CLASS EVALUATIONS**

Upon class completion, trainees can fill out online evaluations. Evaluation results will be immediately summarized and available for reporting.
